1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach and/or suggest a method of diagnosing detrusor instability by inserting a member distal of the urethral sphincter, creating a fluid tight seal to substantially block fluid flow into or out of the urethral canal other than through a channel in the member; measuring a pressure within the urethral canal at a location distal of the urethral sphincter as fluid is being infused through the channel where the infusing step further includes infusing fluid until the urethral sphincter opens and thereafter until at least on detrusor contraction occurs.

2. The allowed claims are 1-11 and 13-20 in that there was no claim 12 present. It appears that the number was inadvertently skipped.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
